*The Book of L* G. Rozenberg 2012-12-06 This book is dedicated to Aristid Lindenmayer on the occasion of his 60th birthday on November 17, 1985.

Contributions range from mathematics and theoretical computer science to biology. Aristid Lindenmayer introduced language-theoretic models for developmental biology in 1968. Since then the models have been cus tomarily referred to as L systems. Lindenmayer's invention turned out to be one of the most beautiful examples of interdisciplinary science: work in one area (developmental biology) induces most fruitful ideas in other areas (theory of formal languages and automata, and formal power series). As evident from the articles and references in this book, the in terest in L systems is continuously growing. For newcomers the first contact with L systems usually happens via the most basic class of L systems, namely, DOL systems. Here "0" stands for zero context between developing cells. It has been a major typographical problem that printers are unable to distinguish between 0 (zero) and 0 (oh). Thus, DOL was almost always printed with "oh" rather than "zero", and also pronounced that way. However, this misunderstanding turned out to be very fortunate. The wrong spelling "DOL" of "DOL" could be read in the suggestive way: DO L Indeed, hundreds of researchers have followed this suggestion. Some of them appear as contributors to this book. Of the many who could not contribute, we in particular regret the absence of A. Ehrenfeucht, G. Herman and H.A. Maurer whose influence in the theory of L systems has been most significant.

Scarlatti composed operas, cantatas, symphonias and liturgical pieces, but his 555 keyboard sonatas are most well-known; a vast collection of single movements in binary form. Lily Afshar's arrangement of Sonata K. 11 (a favorite of Segovia) utilizes staccato articulation reminiscent of the harpsichord and other techniques including cross-string trills and minimal slurs. The pair of sonatas work well together, written in E minor and E major. Sylvius Leopold Weiss (1687-1750) was the most accomplished lutenist of theBaroque period and the most prolific composer of lute music, writing over one thousand pieces for the instrument. The four pieces arranged in this book show the beautiful polyphony and fantastical writing of Weiss. Afshar utilizes campanella (cross-string) fingerings throughout to emphasize the musical line and produce a fuller sound on the instrument

At 59, Jerry Battle is coasting through life. His favorite pastime is flying his small plane high above Long Island. Aloft, he can escape from the troubles that plague his family, neighbors, and loved ones on the ground. But he can't stay in the air forever.
