Parenting Matters National Academies of Sciences, Engineering, and Medicine 2016-11-21 Decades of research have demonstrated that the parent-child dyad and the environment of the familyâ€"which includes all primary caregiversâ€"are at the foundation of children's well- being and healthy development. From birth, children are learning and rely on parents and the other caregivers in their lives to protect and care for them. The impact of parents may never be greater than during the earliest years of life, when a child's brain is rapidly developing and when nearly all of her or his experiences are created and shaped by parents and the family environment. Parents help children build and refine their knowledge and skills, charting a trajectory for their health and well-being during childhood and beyond. The experience of parenting also impacts parents themselves. For instance, parenting can enrich and give focus to parents' lives; generate stress or calm; and create any number of emotions, including feelings of happiness, sadness, fulfillment, and anger. Parenting of young children today takes place in the context of significant ongoing developments. These include: a rapidly growing body of science on early childhood, increases in funding for programs and services for families, changing demographics of the U.S. population, and greater diversity of family structure. Additionally, parenting is increasingly being shaped by technology and increased access to information about parenting. Parenting Matters identifies parenting knowledge, attitudes, and practices associated with positive developmental outcomes in children ages 0-8; universal/preventive and targeted strategies used in a variety of settings that have been effective with parents of young children and that support the identified knowledge, attitudes, and practices; and barriers to and facilitators for parents' use of practices that lead to healthy child outcomes as well as their participation in effective programs and services. This report makes recommendations directed at an array of stakeholders, for promoting the wide-scale adoption of effective programs and services for parents and on areas that warrant further research to inform policy and practice. It is meant to serve as a roadmap for the future of parenting policy, research, and practice in the United States.

Living Democracy Daniel M. Shea 2008-12-01 Everything about this dynamic book--from its engaging writing and examples, to its bold graphics and photos, to its innovative learning pedagogy and interactive assessment--is designed to get students to participate: in their learning, in the classroom, and in all aspects of American politics. American Government instructors overwhelmingly cite student apathy as the single biggest problem in their course; students are simply not engaged in the material and do not believe that the government can affect and enrich their lives. Lead author Dan Shea, founder of the Center for Political Participation, along with co-authors Joanne Connor Green and Christopher E. Smith teamed up to write an American Government text that helps students experience the impact of government in their daily lives and inspires them to work to affect that government in return. Written with the belief that the American Government course is critically important for our students--as well as for the long-term stability of the democratic process--Living Democracy helps students draw connections between course topics and current events and find a role for themselves in politics and government. The text's innovative approach to American government presents the dynamic nature of our country's democratic process more accurately than any other book currently on the market, while offering all of the material found in a comprehensive, traditionally organized government text within an active framework. The Brief edition includes the coverage of the comprehensive version in a stream-lined format. Now in its second edition, this attention-getting text is building on its message of participation: improvements to its innovative pedagogical system with even more assessment opportunities help students participate more fully in their own learning process, while new Student Profiles of politically active young people from around the world continue to promote students' political participation. New coverage highlights the events surrounding the 2008 Election including the massive growth in voter participation.

The Future of Nursing Institute of Medicine 2011-02-08 The Future of Nursing explores how nurses' roles, responsibilities, and education should change significantly to meet the increased demand for care that will be created by health care reform and to advance improvements in America's increasingly complex health system. At more than 3 million in number, nurses make up the single largest segment of the health care work force. They also spend the greatest amount of time in delivering patient care as a profession. Nurses therefore have valuable insights and unique abilities to contribute as partners with other health care professionals in improving the quality and safety of care as envisioned in the Affordable Care Act (ACA) enacted this year. Nurses should be fully engaged with other health

professionals and assume leadership roles in redesigning care in the United States. To ensure its members are well-prepared, the profession should institute residency training for nurses, increase the percentage of nurses who attain a bachelor's degree to 80 percent by 2020, and double the number who pursue doctorates. Furthermore, regulatory and institutional obstacles -- including limits on nurses' scope of practice -- should be removed so that the health system can reap the full benefit of nurses' training, skills, and knowledge in patient care. In this book, the Institute of Medicine makes recommendations for an action-oriented blueprint for the future of nursing.
