Geographic Information Systems to Spatial Data Infrastructures Ian Masser 2019-09-25 This book draws on author’s wealth of knowledge working on numerous projects across many countries. It provides a clear overview of the development of the SDI concept and SDI worldwide implementation and brings a logical chronological approach to the linkage of GIS technology with SDI enabling data. The theory and practice approach help understand that SDI development and implementation is very much a social process of learning by doing. The author masterfully selects main historical developments and updates them with an analytical perspective promoting informed and responsible use of geographic information and geospatial technologies for the benefit of society from local to global scales. Features Subject matter spans thirty years of the development of GIS and SDI. Brings a social science perspective into GIS and SDI debates that have been largely dominated by technical considerations. Based on a world-wide perspective as a result of the author’s experience and research in the USA, Australia, Canada, Brazil, Peru, China, India, Korea, Malaysia, and Japan as well as most European countries. Draws upon professional and academic experience relating to pioneering UK and European GIS research initiatives. Includes updated historical material with an analytical perspective explaining what was done right, and what didn't work.

Literature, Geography, Translation Stefan Helgesson 2011-05-25 The present volume connects three academic fields that share central concerns but remain surprisingly isolated from each other: world literature studies, postcolonial studies, and translation studies. It approaches translation not as a vague metaphor but as a distinct and socially embedded practice that connects literatures. In similar vein, it interrogates the smoothness of many versions of “global” theory by insisting on the specificity of place and the resistance to translatability among languages, oeuvres and genres. The topics covered in the chapters include the formation of world literature as a progamme of study, the French concept of littérature-monde, the rise of English in nineteenth-century Sweden, the translation of Arabic literature in Europe, and the transnationalism of the avant-garde. Through such case studies, and by drawing on the theoretical frameworks of Édouard Glissant, Pierre Bourdieu and David Damrosch, among others, the international group of contributors add substantially to the theoretical and methodological consolidation of world literature as a field of research.

Engaging with Strangers Debra McDougall 2016-01-01 The civil conflict in Solomon Islands (1998-2003) is often blamed on the failure of the nation-state to encompass culturally diverse and politically fragmented communities. Writing of Ranongga Island, the author tracks engagements with strangers across many realms of life—pre-colonial warfare, Christian conversion, logging and conservation, even post-conflict state building. She describes startling reversals in which strangers become attached to local places, even as kinspeople are estranged from one another and from their homes. Against stereotypes of rural insularity, she argues that a distinctive cosmopolitan openness to others is evident in the rural Solomons in times of war and peace.

Writing, Travel and Empire Peter Hulme 2007-08-29 The British Empire drew on the talents of many remarkable figures whose lives reveal a wonderfully rich interweaving with the crucial issues of the period. In some cases they left a legacy of travel writing, novels, biography and ethnography which made important contributions to our knowledge of other cultures. Writing, Travel and Empire explores the lives and writings of ten figures, including Sir George Grey, Winwood Reade, Roger Casement, and Gertrude Bell. Embracing issues such as gender and travel, racial science, the globalization of "native management," the internal colonies, and with a geographical coverage that extends from South America to Russia via Africa and the South Seas, the essays will engage all those with an interest in cultural geography, postcolonial studies, anthropology, biography and travel writing.

Animation in China Sean Macdonald 2015-11-06 By the turn of the 21st century, animation production has grown to thousands of hours a year in the People’s Republic of China (PRC). Despite this, and unlike American blockbuster productions and the diverse genres of Japanese anime, much animation from the PRC remains relatively unknown. This book is an historical and theoretical study of animation in the PRC. Although the Wan Brothers produced the first feature length animated film in 1941, the industry as we know it today truly began in the 1950s at the Shanghai Animation Film Studio (SAFS), which remained the sole animation studio until the 1980s. Considering animation in China as a convergence of the institutions of education, fine arts, literature, popular culture, and film, the book takes comparative approaches that link SAFS animation to contemporary cultural production including American and Japanese animation, Pop Art, and mass media theory. Through readings of classic films such as Princess Iron Fan, Uproar in Heaven, Princess Peacock, and Nezha Conquers the Dragon King, this study represents a revisionist history of animation in the PRC as a form of "postmodernism with Chinese characteristics." As a theoretical exploration of animation in the People’s Republic of China, this book will appeal greatly to students and scholars of animation, film studies, Chinese studies, cultural studies, political and cultural theory.

The Geographies of Enlightenment Edinburgh Phil Dodds 2022-04-15 Edinburgh was an Enlightenment city of regional, national and global influence. But how did the people of Enlightenment Edinburgh understand and order their world? How did they encounter, compare and produce different kinds of spaces, from the urban to the world scale? And how did this city set the universal standards by which other places should be judged and transformed? The Geographies of Enlightenment Edinburgh answers these questions by exploring the thousands of urban plans, county surveys, travel accounts and encyclopaedias that passed through a busy Edinburgh bookshop over four decades. It reveals how these geographical publications were produced and shared, and sheds light on the people who bought and used them - including moral philosophers, silk merchants, school teachers, ship’s surgeons and slave owners. This is the story of how specific methods of mapping space came ultimately to predict and organize it, creating a new world in Edinburgh’s image. By connecting global processes of knowledge production to intimate accounts of its reception in the city, this book deepens our understanding of the Scottish Enlightenment and the world it made.

The Shaping of America: A Geographical Perspective on 500 Years of History D. W. Meinig 2010-01-01 This landmark book, the concluding volume of D. W. Meinig’s magisterial series The Shaping of America, presents the story of America’s interwoven history and geography from 1915 to 2000. The author describes decades of enormous national growth and change in his characteristic engaging style, and through more than seventy original maps he ingeniously depicts diverse twentieth-century trends and developments. The book addresses the expanding nation’s progress in terms of the automotive revolution; neotechnic evolution; access to air travel; growth of instantaneous forms of communication, including telephones, television, and the Internet; and such political events as World War II. Meinig relates these developments to social and geographic trends, among them patterns of urban migration, regionalism, metropolitanization, the beginnings of the urban megalopolis, shifts in ethnic and religious populations, and, on a more global scale, transformations in

America’s connections with Europe, Asia, and Latin America. A masterful synthesis of twentieth-century history and geography, this book offers unprecedented insights into the shaping and reshaping of the United States over the past century.

Media Studies: The Basics Julian McDougall 2019-10-09 Fully updated and revised, the second edition of Media Studies: The Basics is the ideal guide to the changing landscape of media and media studies. There have been seismic shifts in what constitutes (the) media in recent years with technological advances ushering in whole new categories of producers, consumers and modes of delivery. This has been reflected in the way media is studied with new theories, concepts and practices coming to the fore. This new edition addresses core questions including: Who, or what, are the media? What are the key terms and concepts used in analysing media? Where have new media technologies had the biggest impact? How, and by whom, is media made in the 21st century? Featuring new case studies, an updated glossary and suggestions for further reading, this is the ideal introduction to media studies today for both A Level and Undergraduate students.

The Tragedy of U.S. Foreign Policy Walter A. McDougall 2018-11-22 A fierce critique of civil religion as the taproot of America’s bid for global hegemony Pulitzer Prize-winning historian Walter A. McDougall argues powerfully that a pervasive but radically changing faith that “God is on our side” has inspired U.S. foreign policy ever since 1776. The first comprehensive study of the role played by civil religion in U.S. foreign relations over the entire course of the country’s history, McDougall’s book explores the deeply infused religious rhetoric that has sustained and driven an otherwise secular republic through peace, war, and global interventions for more than two hundred years. From the Founding Fathers and the crusade for independence to the Monroe Doctrine, through World Wars I and II and the decades-long Cold War campaign against “godless Communism,” this coruscating polemic reveals the unacknowledged but freely exercised dogmas of civil religion that bind together a “God blessed” America, sustaining the nation in its pursuit of an ever elusive global destiny.

Muslims and Islam in U.S. Education Liz Jackson 2014-04-03 Winner of Philosophy of Education Society of Australasia (PESA)'s inaugural PESA Book Awards in 2015, and The University of Hong Kong Research Output Prize for Education 2014-15. Muslims and Islam in U.S. Education explores the complex interface that exists between U.S. school curriculum, teaching practice about religion in public schools, societal and teacher attitudes toward Islam and Muslims, and multiculturalism as a framework for meeting the needs of minority group students. It presents multiculturalism as a concept that needs to be rethought and reformulated in the interest of creating a more democratic, inclusive, and informed society. Islam is an under-considered religion in American education, due in part to the fact that Muslims represent a very small minority of the population today (less than 1%). However, this group faces a crucial challenge of representation in United States society as a whole, as well as in its schools. Muslims in the United States are impacted by ignorance that news and opinion polls have demonstrated is widespread among the public in the last few decades. U.S. citizens who do not have a balanced, fair and accurate view of Islam can make a variety of decisions in the voting booth, in job hiring, and within their small-scale but important personal networks and spheres of influence, that make a very negative impact on Muslims in the United States. This book presents new information that has implications for curricula, religious education, and multicultural education today, examining the unique case of Islam in U.S. education over the last 20 years. Chapters include: Perspectives on Multicultural Education 9/11, the Media, and the New Need to Know Islam and Muslims in Public Schools Blazing a Path for Intercultural Education This book is an essential resource for professors, researchers, and teachers of social studies, particularly those involved with multicultural issues, critical and sociocultural analysis of education and schools; as well as interdisciplinary scholars and students in anthropology and education.

Conquests and Cultures Thomas Sowell 2008-08-01 This book is the culmination of 15 years of research and travels that have taken the author completely around the world twice, as well as on other travels in the Mediterranean, the Baltic, and around the Pacific rim. Its purpose has been to try to understand the role of cultural differences within nations and between nations, today and over centuries of history, in shaping the economic and social fates of peoples and of whole civilizations. Focusing on four major cultural areas(that of the British, the Africans (including the African diaspora), the Slavs of Eastern Europe, and the indigenous peoples of the Western Hemisphere--Conquests and Cultures reveals patterns that encompass not only these peoples but others and help explain the role of cultural evolution in economic, social, and political development.

Saharan Frontiers James McDougall 2012 The Sahara has long been portrayed as a barrier that divides the Mediterranean world from Africa proper and isolates the countries of the Maghrib from their southern and eastern neighbors. Rather than viewing the desert as an isolating barrier, this volume takes up historian Fernand Braudel's description of the Sahara as "the second face of the Mediterranean." The essays recast the history of the region with the Sahara at its center, uncovering a story of densely interdependent networks that span the desert's vast expanse. They explore the relationship between the desert's "islands" and "shores" and the connections and commonalities that unite the region. Contributors draw on extensive ethnographic and historical research to address topics such as trade and migration; local notions of place, territoriality, and movement; Saharan cities; and the links among ecological, regional, and world-historical approaches to understanding the Sahara.

Cultural Psychology Robyn M. Holmes 2020-01-30 Cultural Psychology draws upon major psychological topics, theories, and principles to illustrate the importance of culture in psychological inquiry. Exploring how culture broadly connects to psychological processing across diverse cultural communities and settings, it highlights the applied nature of cultural psychology to everyday life events and situations, presenting culture as a complex layer in which individuals acquire skills, values, and abilities. Two central positions guide this textbook: one, that culture is a mental and physical construct that individuals live, experience, share, perform, and learn; and the second, that culture shapes growth and development. Culture-specific and cross-cultural examples highlight connections between culture and psychological phenomena. The text is multidisciplinary, highlighting different perspectives that also study how culture shapes human phenomena. Topics include an introduction to cultural psychology, the history of cultural psychology, cultural evolution and cultural ecology, methods, language and nonverbal communication, cognition, and perception. Through coverage of social behaviour, the book challenges students to explore the self, identity, and personality; social relationships, social attitudes, and intergroup contact in a global world; and social influence, aggression, violence, and war. Sections addressing growth and development include human development and its processes, transitions, and rituals across the lifespan, and socializing agents, socialization practices, and child activities. Additionally, the book features discussions of emotion and motivation, mental health and

psychopathology, and future directions for cultural psychology. Chapters contain teaching and learning tools including case studies, multidisciplinary contributions, thought-provoking questions, class and experiential activities, chapter summaries, and additional print and media resources.

Culture, Self-Identity, and Work Miriam Erez 1993-08-12 A great deal of research has recently been completed on behavior and the organization of work, most of which has viewed it from an ethnocentric perspective. In this work, Erez and Earley show how this is insufficient to develop a global theory of work behavior- it necessitates the inclusion of a cultural perspective. Solidly grounding their work in the fields of psychology, management, and anthropology, the authors propose a new theoretical framework utilizing individual's self-concept as a means of linking cultural beliefs and social interaction to emergent work behavior. The book includes specific recommendations for structuring work environments and managerial processes to match cultural practices and enhance productivity in the workplace, making it an essential reference for scholars, students, and professionals.

Thinking with Animation Joff P. N. Bradley 2021-08-09 This volume brings together scholars based predominantly in Asia to contribute provocative and experimental essays on the dynamic relationship between animation and philosophy. In an inventive and playful philosophical way, they address not only the mainstay of Japanese animation, but also Korean film, picture books and Mickey Mouse to understand what we might call film-philosophy in Asia. In thinking animation with concepts from the technicolour philosophies of Deleuze, Guattari, Stiegler, Benjamin, Kristeva and Heidegger, the book sees animation not as a representation of a philosophical idea per se, but conceptualizes it as a philosophical thinking-device. In the images themselves, what is at work is not just the thinking of a particular director or manga artist, but, rather, thinking as such, through and by the images themselves. The scholars in this collection are committed to thinking images themselves as thought-experiments and thinking machines.

Nation, Society and Culture in North Africa James McDougall 2004-08-02 The essays in this volume explore the complexities of the relationship between states, social groups and individuals in contemporary North Africa, as expressed through the politics, culture and history of nationhood. From Morocco to Libya, from bankers to refugees, from colonialism to globalisation, a range of individual studies examines how North Africans have imagined and made their world in the twentieth century.

Royal Bastards Sara McDougall 2016-11-03 The stigmatization as 'bastards' of children born outside of wedlock is commonly thought to have emerged early in Medieval European history. Christian ideas about legitimate marriage, it is assumed, set the standard for legitimate birth. Children born to anything other than marriage had fewer rights or opportunities. They certainly could not become king or queen. As this volume demonstrates, however, well into the late twelfth century, ideas of what made a child a legitimate heir had little to do with the validity of his or her parents' union according to the dictates of Christian marriage law. Instead a child's prospects depended upon the social status, and above all the lineage, of both parents. To inherit a royal or noble title, being

born to the right father mattered immensely, but also being born to the right kind of mother. Such parents could provide the most promising futures for their children, even if doubt was cast on the validity of the parents' marriage. Only in the late twelfth century did children born to illegal marriages begin to suffer the same disadvantages as the children born to parents of mixed social status. Even once this change took place we cannot point to 'the Church' as instigator. Instead, exclusion of illegitimate children from inheritance and succession was the work of individual litigants who made strategic use of Christian marriage law. This new history of illegitimacy rethinks many long-held notions of medieval social, political, and legal history.

Geographical Thoughts in India Rana Singh 2009-05-27 This book deals with roots of Indian geographical thoughts with reference to its historical base, cultural context and visionary message. As a consequence of long cultural history the resultant lifeworld in India converges like a drama and dance of space-time function with transference and transformation. In the passage of time emerged a metaphysical frame of thought, the varieties of heritagescapes, and simultaneously grown the senses to heritage ecology. Of course, attempts have been scanty but the richness always portrayed in literature and literary geography. Historical and cultural geographies in India have not caught that much attention in the academia; however on micro-level distinct attributes are interpreted in the recent literature. Going back to the ancient notions of nature theology, religioscapes and rituals have developed a complex network of belief systems in the Hindu traditions. In these traditions the motherly river Ganga serves as symbol, system and metaphor in the Indian culture. Continuity of cultural manifestations is actively maintained and continued in the Indian villages, where lives three-fourths of India's population, and serve like a 'place ballet'. India's catastrophic march on the road of development and technology is entangled with obstacles and socio-spatial gaps that need to be re-considered in the light of cultural background and historical legacy. All these issues are examined, emphasising dualistic and complimentary perspectives in the West and the East. A History of Algeria James McDougall 2017-04-24 Covering a period of five hundred years, from the arrival of the Ottomans to the aftermath of the Arab uprisings, James McDougall presents an expansive new account of the modern history of Africa's largest country. Drawing on substantial new scholarship and over a decade of research, McDougall places Algerian society at the centre of the story, tracing the continuities and the resilience of Algeria's people and their cultures through the dramatic changes and crises that have marked the country. Whether examining the emergence of the Ottoman viceroyalty in the early modern Mediterranean, the 130 years of French colonial rule and the revolutionary war of independence, the Third World nation-building of the 1960s and 1970s, or the terrible violence of the 1990s, this book will appeal to a wide variety of readers in African and Middle Eastern history and politics, as well as those concerned with the wider affairs of the Mediterranean.
